## EDUCATION

---

### Escuela Superior de Cómputo (IPN)

Expected Jan 2027

*Bachelor's degree in Artificial Intelligence Engineering*

### Centro de Estudios Científicos Y Tecnológicos No.8 "Narciso Bassols"

2018-2021

*Associate's degree in Industrial Technology/Technician*

## TECHNICAL SKILLS

---

**Languages:** Python, C, Lua, Java

**Frameworks & Tools:** Keras, Scikit-learn, Git/GitHub actions, Unity, Azure, Linux/Bash, Jupyter Notebooks

**Core Competencies:** Software Development, Artificial Intelligence, Machine Learning, Cloud Computing, RESTful API integration

## PROJECTS

---

### AI-Powered Discord Chatbot

2025

- Engineered an interactive Discord bot integrating third-party RESTful APIs, including OpenWeather for real-time environmental data and OpenRouter for LLM-driven conversational capabilities.
- Handled asynchronous requests and JSON data parsing to ensure seamless, low-latency user interactions within the server environment.

### Virtual Assistant for Microenterprises

Feb 2026 – Present

- Designing and implementing a digital assistant tailored for small businesses in Mexico City, featuring a dedicated sales module and inventory tracking system.
- Architecting the backend logic to streamline product management without relying on complex natural language processing, ensuring high reliability and low latency for users.

## EXPERIENCE

---

### IT Helper (Social Service)

Apr 2025 – Sep 2025

*Instituto Politécnico Nacional*

*Mexico City, Hybrid*

- Delivered comprehensive technical support and online assistance in a hybrid environment, systematically troubleshooting software and network issues.
- Translated complex technical diagnostics into clear, actionable steps for non-technical users, ensuring system reliability and minimizing downtime.
- Conducted quality assurance reviews on multimedia resources, verifying the accuracy of course data and educational materials.
